### **Completing the Detection Report Form**

**Heading (Blocks 1-7):** Enter all information requested. In Block 6, **LOCATION**, provide sufficient information for the injury center to be relocated. If possible, attach a location map to this form.

**Injury Description (Blocks 8-15):** Check as many boxes as are applicable, and fill in the requested information as completely as possible.

**Stand Description (Blocks 16-21):** This information will aid the examiner in determining how the stand conditions contributed to the pest situation. In Block 18 indicate the major tree species in the overstory and understory. In Block 19, indicate the stand age in years and/or the size class (seedling-sapling; pole; young sawtimber; mature sawtimber; overmature or decadent).

**Pest Names (Block 22):** Write a detailed description of the pest or pests, the injury symptoms, and any contributing factors.

**Action Requested (Block 24):** Mark "Field Evaluation" only if you consider the injury serious enough to warrant a professional site evaluation. Mark "Information Only" if you are reporting a condition that does not require further attention. All reports will be acknowledged and questions answered on the lower part of this form.

**Reply (Section II):** Make no entries in this block; for examining personnel only. A copy of this report will be returned to you with the information requested.

**Handling Samples:** Please submit injury samples with each detection report. If possible, send several specimens illustrating the stages of injury and decline. Keep samples cool and ship them immediately after collection. Send them in a sturdy container, and enclose a completed copy of the detection report.

**Your participation in the Cooperative Forest Pest Detection Survey is greatly appreciated.** Additional copies of this form are available from the Forest Service - Forest Health Protection, and from the California Department of Forestry and Fire Protection.
